Features

- 1.International standard dimension.
- 2.ABS fireproof material.
- 3.Multi options for color.
- 4.Easy installation suitable for ecurity doors, escape door, security systems.

Specification

Model	AX-BFE89
Operating voltage	50HZ/24VDC
Maximum Current	8A

AX-BFE89

Emergency Push Button Switch

Connection impedance	less than 0.1 ohm
Operating temperature	10°C to 60°C
Operating Humidity	93±2%,Can Resettable.
Dimensions	86Lx86Wx55H(mm)
Weight	0.18kg

Models

AX-BFE89GN: (Color: Green)

It is normally used in access control systems and door release applications. White is used in these systems , too.

AX-BFE89YL: (Color:Yellow)

It is used in gas release or pressure-relief gates and occasionally venting systems.

AX-BFE89WH: (Color: White)

It is used in electrical systems to match standard white fittings.

AX-BFE89RD: (Color: Red)

According to the requirements of fire standards, the color of the accessories used in fire fighting systems should be bright and easily identified. Thus most call points used in fire fighting system are red.
